WORK EXPERIENCE

Senior Reactjs Developer, Astics Techlabs - Ahmedabad   **April 2023 - Present**

- Hospitality product that provides a seamless experience for guests through a kiosk-based virtual check-in/checkout system, payment, and key dispenser.
- system is built on React.js and uses 11-sight for video calling.
- As a Senior Frontend Developer, I specialized in architecting and implementing highly reusable and easily maintainable features within the existing product, ensuring long-term scalability and efficiency.
- Integrated APIs and libraries to deliver seamless user experiences.

Frontend Developer, GTCSYS - Ahmedabad   **April 2021 - March 2023**

- Developed React.js web applications featuring reusable UI components for enhanced user experiences in home equity, medical billing, and home loan facilitation projects.
- Implemented a public-facing portal with Tailwind CSS and Storyblok CMS, showcasing proficiency in building maintainable and visually appealing UI components.

Reactjs Developer, The One Technologies - Ahmedabad   **Jan 2019 - April 2021**

- Initiated professional development with comprehensive training, followed by hands-on experience in building a React.js application utilizing class components and foundational state management.
- Integrating Redux for enhanced state management and team coordination.
- Demonstrated leadership capabilities by effectively guiding and mentoring a team of two developers, ensuring project milestones were achieved.

ADDITIONAL INFORMATION

- **Basic Technical Skills:** Angular, Express.
- **Languages:** English, Hindi, Gujarati.
- Having 5+ years of experience with all React latest features like Context, Router, Hooks.
- Having a strong understanding of React's component lifecycle and hooks, enabling me to create efficient and performant user interfaces.
- Ability to demonstrate proficiency in Responsive Design & Accessibility.
- Client and other team collaboration / coordination.
- Excellent written and verbal communication skills.
